

714/744 P STREET SACRAMENTO, CA 95814

#### PRELIMINARY ASSESSMENT SUMMARY

Abex Corporation Amsco Division, Oakland Plant 850 Ferry Street Oakland, CA 94607 EPA No. CAD980358733

### History and Problem

Abex Corporation operated a manganese and steel foundry at the Port of Oakland from 1921 to 1977. Wastes produced consisted of foundry sand and slag. Wastes were piled or landfilled on-site. Mr. Charles Borcherding of Abex Corporation indicated that the company does not suspect the wastes contained any hazardous components. No analyses were conducted on wastes from this site because it closed before the implementation of RCRA. However, basing his assumptions on analysis of wastes from similar existing Abex facilities, Mr. Borcherding felt that the wastes were not hazardous by current standards. Abex Corporation closed the Oakland facility in 1977 and returned the property to the Oakland Port Authority in 1978. Before closing the facility, Abex disposed of stockpiled and landfilled wastes off-site. In 1978, the Port Authority demolished the facility. The site was paved and is currently operated by the Port as a sea-land container storage area.

#### Recommendation

Based on the lack of information on the waste types produced by Abex Corporation, it is recommended that the site be given low priority status. Although there is no evidence to indicate that the site poses any health or environmental threat, sampling is necessary to achieve certainty about the composition of the buried wastes.

# PRELIMINARY ASSESSMENT Region 9

Preparer's Name Carol Sim

Date January 4, 1983
